HTx Project | Next Generation Health Technology Assessment

HTx is a Horizon 2020 project supported by the European Union, kicking off in January 2019 and lasting for 5 years. The main aim of HTx is to create a framework for the Next Generation Health Technology Assessment (HTA) to support patient-centred, societally oriented, real-time decision-making on access to and reimbursement for health technologies throughout Europe. HTx aims to facilitate the development of methodologies to deliver more customized information on the effectiveness and cost-effectiveness of complex and personalised combinations of health technologies, provide methods to support personalised treatment advice and pilot the implementation of these methods in Europe.

Partner institutions

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 825162.
HTx at the HTAi Annual Meeting

Panels

Monday June 27th 9:00-10:15

Monday June 27th 9:00-10:15
Building Bridges Between Patient And Treatment - Perspectives On Harmonizing Health Technology Assessment With Up And Down-Stream Stakeholders. Hogervorst, M., Møllebæk, M., Vreman, R., Mantel-Teeuwisse, A., Hallgreen, C., Goettsch, W.

Wednesday June 29th 8:30-9:45
Outcome-based reimbursement and delayed-payment schemes for new technologies Central and Eastern European and Middle Eastern countries. Callenbach, M., Ádám, I., Kahveci, R., Lipska, I., Goettsch, W.

Presentation

Tuesday June 28th 14:00-15:00
Patient Reported Outcome Measure-select app. Quik, E.
